Hiring Manager

Glidewell Dental

Dear Hiring Manager:

I am excited to apply for the Software Development internship position at Glidewell Dental. As a first-year graduate student in Software Engineering at Northeastern University, I am confident that my skills and experience align with the requirements of this internship program.

I have gained valuable experience during my previous position as a System Engineer at Tata Consultancy Services, where I worked on complicated issues in the software development industry for almost two years. Additionally, my coursework in Object-Oriented Design and Web Design User Experience Engineering has helped me develop my knowledge and understanding of software development best practices, including hands-on assignments on NodeJS, ReactJS, and Angular, as well as HTML, CSS, and MongoDB.

As a passionate problem solver and a fan of challenges, I am confident that I can leverage my programming knowledge to work on unconventional projects during this internship program. I am experienced in full-stack development, with extensive hands-on experience in front-end web technologies such as JavaScript and jQuery and backend technologies such as NodeJS. Furthermore, I am eager to learn new technologies and platforms, such as C++, Typescript, Python, or C# and have a strong interest in UI development.

I have excellent communication skills and can effectively communicate ideas, needs, and issues to peers and management, including the communication of requirements, development, progress, new ideas, errors found, etc.

I am excited about the opportunity to partner with a mentor who will provide guidance and real-world education throughout this program. I am also eager to collaborate with individuals and teams to accomplish department milestones and, most importantly, have fun!

Thank you for considering my application. I look forward to discussing this opportunity further with you. Please feel free to call me at 857-693-1743 or email me at khismatrao.p@northeastern.edu.

Sincerely,

Pranav Khismatrao
