Hiring Manager
Hewlett Packard

Dear Hiring Manager:

I am excited to apply for the Software Development position at **Hewlett Packard**. As a first-year graduate student in Software Engineering at Northeastern University's College of Engineering, I have built a strong foundation in software development methodologies, principles, practices, and the software development lifecycle

In my previous role as a System Engineer at Tata Consultancy Services, I worked on complex issues in the software development business for over a year and seven months. I have hands-on experience in full-stack development, including front-end Web technologies such as JavaScript and jQuery, as well as back-end technologies such as NodeJS. I have also worked with a team of 20 people, responsible for designing, scalability, maintainability, and development using Agile methodology. Additionally, as a graduate student, I have enrolled in classes such as Object-Oriented Design, which includes topics such as Factory Design and SOLID Design Patterns, and Web Design User Experience engineering, which includes hands-on assignments on NodeJS, ReactJS, and Angular, along with HTML CSS to develop rich UI with MongoDB as a database.

I have also recently developed a project with all REST APIs and integration of API calls in ReactJS for my web design project submission. I am confident that I can perform development activities within the team, including developing new features, identifying, fixing, and documenting bugs, participating in peer code reviews, contributing to the team's knowledge base, and analysing and designing software and configuration changes.

I have a strong foundation in programming languages such as python, JavaScript, and Java, as well as familiarity with SQL/NoSQL DBs. I also have exposure to full-stack Java software development, Java frameworks and application servers, Web Services (SOAP/REST API), responsive JS (Angular/Node/React.js), and version control (preferably Git).

As a driven individual with exceptional communication and presentation skills, I am confident that I can make a positive impact at Hewlett Packard. My GPA is 4.0, and I am committed to seeking out what's next and delivering exceptional results.

Thank you for considering my application. I look forward to discussing this opportunity further with you.

Sincerely,
Pranav Khismatrao
