Hiring Manager

ColdSnap

Dear Hiring Manager:

I am excited to apply for the Summer Intern position at ColdSnap, as advertised on your company's career site. As a current graduate student pursuing a Master's in Software Engineering at Northeastern University, I am confident that my skills and experience align with the requirements of this position.

I am particularly drawn to ColdSnap's mission to enrich lives and progress society through creativity and technology. I believe my technical abilities and passion for software development would be a great asset to the company's goal of creating a better-connected world.

During my previous position as a System Engineer at Tata Consultancy Services, I worked on complicated issues in the software development industry for over a year and a half. As a software developer, I have extensive hands-on experience in full-stack development using front-end Web technologies like JavaScript and jQuery as well as backend technologies involving NodeJS. Additionally, I have worked with a team of 20 people overall responsible for Designing, Scalability, maintainability as well as Development using Agile Methodology.

As a graduate student, I am currently enrolled in classes like Object-Oriented Design which includes topics such as Factory Design and SOLID Design Patterns, and Web Design User Experience engineering which includes hands-on assignments on NodeJS, ReactJS, and Angular along with HTML CSS to develop rich UI with MongoDB as the database, to expand my knowledge base and advance my understanding of software development by using coding best practices to address challenging real-world issues. Recently, I developed a project with all REST APIs and integration of API calls in ReactJS for my web design Project submission.

I am confident that my skills in Java, and REST API, as well as my experience with Microservices, and Spring Framework, would make me a valuable addition to your team. I am also excited about the opportunity to gain more experience with React, and Angular, as these are technologies that align with my interests and career aspirations.

Thank you for considering my application. I am eager to discuss my qualifications further, and you can reach me at 857-693-1743 or khismatrao.p@northeastern.edu.

Sincerely,

Pranav Khismatrao
