Hiring Manager

**Agilent**

Dear Hiring Manager:

I am writing to express my interest in the Software Development Intern position at Agilent. As a Junior at Northeastern University, pursuing a degree in Software Engineering, I am eager to apply my skills and knowledge to assist in developing custom software applications to support your customers.

During my previous experience as a System Engineer at Tata Consultancy Services, I gained hands-on experience in full-stack development using front-end web technologies like JavaScript and jQuery, as well as backend technologies involving NodeJS. Additionally, as a graduate student in an accredited university, I am equipped with strong analytical ability, algorithm background, and programming skills. Moreover, my courses such as Object-Oriented Design and Web Design User Experience Engineering have given me the opportunity to gain a solid grasp on data structures and OOP and hone my debugging and problem-solving skills.

I am highly motivated, a fast learner, and have excellent written and oral communication skills. I have a systematic, goal-oriented, and independent way of working and have experience working with a team of 20 people, responsible for designing, scalability, maintainability, and development using Agile Methodology. I am excited to expand my programming skills by learning new technologies, methodologies and solving challenging technical problems in a start-up like environment.

I am proficient in programming in C#/.NET and have solid experience in C# coding, including multi-threaded applications, and code reviewing skills. I also have a working knowledge of JavaScript scripting language, which will aid in the development of custom software applications.

Thank you for considering my application. I would welcome the opportunity to discuss further how I can contribute to Agilent's team. Please feel free to call me at 857-693-1743 or email me at [khismatrao.p@northeastern.edu](mailto:khismatrao.p@northeastern.edu).

Sincerely,

Pranav Khismatrao
