Hiring Manager

Human Relations Department

Electronic Arts

Dear Hiring Manager:

I am a First-year graduate student at Northeastern University's College of Engineering with a focus on Software Engineering. I am writing to express my keen interest in the Software Development Intern position that I discovered on the **Electronic Arts (EA)** career site. As a passionate gamer and a software developer, I believe that EA would be the perfect place for me to hone my skills and contribute to the development of top-notch gaming software.

My experience as a System Engineer at Tata Consultancy Services for approximately 1 year and 7 months exposed me to a wide range of software development challenges. As a software developer, I have hands-on experience in full-stack development using front-end Web technologies like JavaScript and jQuery, as well as backend technologies involving NodeJS, java and C#. During my tenure at TCS, I worked with a team of 20 people responsible for Designing, Scalability, maintainability as well as Development using Agile Methodology.

As a graduate student, I am continuously expanding my knowledge base and advancing my understanding of software development by enrolling in classes such as Object-Oriented Design, which includes topics such as Factory Design and SOLID Design Patterns, and Web Design User Experience engineering, which includes hands-on assignments on NodeJS, ReactJS, and Angular along with HTML CSS to develop rich UI with MongoDB as the database. Recently, I developed a project with all REST APIs and integration of API calls in ReactJS for my web design Project submission.

In addition to my software development skills, I also have experience in the Machine Learning and Data Science domain. My final year project, which was also my publication, involved applying machine learning algorithms to detect and predict phishing websites using valid datasets to train and model an algorithm.

I am confident that my technical abilities and experience make me a strong fit for the Software Development Intern position at EA. I am excited to contribute my skills and collaborate with your team to create amazing gaming experiences. Thank you for your time and consideration. I can be reached at 857-693-1743 or khismatrao.p@northeastern.edu to discuss this opportunity further.

Sincerely,

Pranav Khismatrao
