Hiring Manager
Walt Disney

Dear Hiring Manager:

I am excited to apply for the Software Engineering Internship position at Walt Disney that I recently discovered on your career site. As a first-year graduate student at Northeastern University's College of Engineering with a focus on Software Engineering, I have gained hands-on experience in full-stack development using front-end web technologies like JavaScript and jQuery, as well as back-end technologies involving NodeJS. I believe my abilities and talents make me an excellent candidate for this internship, where I can further expand my knowledge and skills in creating custom web-based applications.

In my previous position as a System Engineer at Tata Consultancy Services, I worked on complex issues in the software development business for approximately 1 year and 7 months. During my tenure, I gained experience in designing, scalability, maintainability, and development using Agile methodology while working with a team of 20 people. As a graduate student, I have also enrolled in courses like Object-Oriented Design and Web Design User Experience Engineering, where I worked on assignments related to NodeJS, ReactJS, Angular, HTML, CSS, and MongoDB.

In addition to my technical skills, I have also worked with Continuous Integration and Continuous Delivery platforms like Jenkins and GitHub Actions in partnership with version control software such as Git/GitHub/GitLab for deployment of developed software.

I am confident that my knowledge of programming languages like C#, Java, JavaScript (Node, Typescript), and Groovy will enable me to create efficient, secure, and user-friendly experiences for internal Disney teams, integrating with various SaaS and telephony solutions. I am also familiar with scripting languages like Bash and Batch for creating scheduled tasks and reporting jobs.

As an enthusiastic learner, I am eager to brainstorm new ideas from inception to delivery for new projects and demonstrate benefits to cost or user experience to key stakeholders. I am familiar with task management platforms like Jira, and ServiceNow to track project/incident progress and communicate to leaders on due dates.

I look forward to discussing this opportunity further with you and learning more about how I can contribute to Walt Disney's success. You can reach me at 857-693-1743 or email me at khismatrao.p@northeastern.edu. Thank you for considering my application.

Sincerely,
Pranav Khismatrao
