Hiring Manager
Flywire

Dear Hiring Manager:

I am excited to submit my application for the Software Development position at Flywire. Your company's reputation for innovation and commitment to improving the payment process for individuals and businesses alike is truly inspiring. I believe that my experience, skills, and enthusiasm make me an excellent candidate for this role.

As a first-year graduate student at Northeastern University's College of Engineering, my focus on Software Engineering aligns well with Flywire's technical needs. My experience as a System Engineer at Tata Consultancy Services, where I worked on complex software development issues for over a year, has provided me with valuable knowledge in full-stack development using technologies such as JavaScript, jQuery, and NodeJS. Furthermore, I have worked with a team of 20 people responsible for Designing, Scalability, maintainability, and Development using Agile Methodology.

In addition to my professional experience, I have pursued coursework that has expanded my knowledge of software development best practices, such as Object-Oriented Design and Web Design User Experience Engineering. I have also worked on projects that have involved REST APIs, ReactJS, and Angular, and I have applied machine learning algorithms to detect and predict phishing websites, which resulted in a publication.

I am confident that my skills and experience align well with Flywire's requirements for the Software Development role. I am excited about the opportunity to contribute to your team and to continue learning and growing as a software developer. Please feel free to contact me at 857-693-1743 or email me at khismatrao.p@northeastern.edu to further discuss my qualifications.

Thank you for considering my application, and I look forward to hearing from you soon.

Sincerely,
Pranav Khismatrao
